| H Kids Pool | P Park 2 |

KEY PLAN

MORE SUNLIGHT

SVS SPRINGS apartments designed to have ample space between them to allow natural sun light inside. So, when there's enough natural light, you can save on power bills by using fewer artificial lights.

4 SIDE VENTILATION

Openness on four sides of every apartments allows for free flow of air, and so the entire house is cooler by a few degrees, keeping it fresh and well-ventilated
